

LinkedIn Skills Assessment Super Document

Purpose: replace the existing 79 separate LinkedIn project entries with one consolidated project attachment. This document keeps the skills-assessment format: license, pricing, supported platforms, complements, added details, and proof/example URL fields for each skill.

One LinkedIn Project To Use

Project name	Integrated Skills Assessment Portfolio
Description	A consolidated skills-assessment project covering software development, creative media, cloud/data tools, CAD/3D, business platforms, audio/video production, and office productivity. The attached super document replaces 79 separate project entries with one organized proof-of-skills catalog.
Associated with	Sebastian Martinez / personal LinkedIn profile
Media to attach	This super document, portfolio links, GitHub repositories, demo videos, screenshots, PDFs, audio samples, dashboards, CAD/3D renders, and certificates.

Skills Assessment Catalog

Pricing and license notes are practical profile descriptions, not purchasing quotes. Verify vendor pricing before buying software. Duplicate LinkedIn entries were consolidated, including Autodesk Inventor, jQuery, Microsoft Outlook, Java Spring Boot Compiler, and Spring Boot for Java compiler on the web.
